SUMMARY

I am a passionate and self-driven BCA student currently in my 6th semester at DAV College, with a strong foundation in IT concepts across multiple domains. I am eager to expand my skills in data analysis and database management, and I enjoy exploring new technologies to solve real-world problems. I am seeking a Data Intern position where I can apply my learning, contribute to meaningful projects, and grow in a collaborative, innovative, and results-driven environment.

EXPERIENCE

Hackathon Organizer – DAV Codefest 2025

- Organized a 72-hour hackathon with 150+ participants.
- Led a 5-member team, managing tasks, timeline, and logistics.
- Coordinated with sponsors, faculty, and advisory members.
- Oversaw registration, and real-time event execution.

PROJECTS

Fishtopia

Fishtopia is an ecommerce website Designed and developed with React.js for the frontend and Python (Flask) for the backend using Agile Methodology. User can add products to cart and buy products through Khalti API Integration.

Adopt a Buddy

An adoption platform for dogs and cats built with PHP and MySQL for backend management, and HTML & CSS for the frontend. Developed using the Waterfall methodology, featuring a user-friendly interface, secure checkout, and management of products, orders, and users.

Weather App

Developed a beginner-friendly Android application that integrates location services and fetches real-time weather data from a reliable API. Designed a clean and user-friendly interface to display accurate weather updates, ensuring an engaging user experience.
